

# MOULD LOADER

Automatic transfert loader for filling, vibrating and levelling of polycarbonate moulds (275x175 mm.). The system uses the TOP tempering machine and, with greatly reduced dimensions, performs the same automated operations reserved up to now to traditional industrial models. There are 4 mould movements and 4 workstations: filling via perforated pouring head, 1st vibrating level, pneumatic surface levelling, 2nd vibrating level. The mould is expelled directly into the cooling tunnel for the subsequent removal of the chocolate. Includes product detection sensor.

- Used for making solid bodies (bars, Naolitaines, Gianduiotti, etc...)
- Only compatible with TUN 800/1200.
- This machine must be equipped with a TOP tempering machine with level sensor and a Tank for a pumped supply.

## TECNICAL DATA

**Hourly production:** 360 moulds/h.  
**Power consumption:** 1.5 kW 380V three phase, 5 poles.  
**MUST BE ATTACHED TO A COMPRESSOR WIT A MIN PRESSURE OF 4 BAR.**  
**Dimensions:** H 1500 mm, W 1880 mm, D 670 mm.
